Risk Disclosure Statement: Investment involves risks. The prices of securities fluctuate, sometimes dramatically. The price of securities may move up or down, and may become valueless. It is as likely that losses will be incurred rather than profit made as a result of buying and selling securities.

Investments in VA-related products are potentially riskier than investments in traditional financial products. Before making any investment in VA-related products, you should be satisfied that you have read and fully understand the nature, terms, features and risks of VA-related products, how they work, the extent of your exposure to risks and the potential losses you may incur. Otherwise, you should refrain from investing in VA-related products. You should only invest with funds that you can afford to loss.
